

*A clear
alternative*

Featuring The Louver Mover™ Operating System. A world first... high impact, clear ends and handles blend in with the louvre blades clean lines and the low profile frame. The Louvers R Us concept is the first fully integrated system to include built-in remote control automation options. This system can be included in the Millennium Balustrade range.

Our Louvre system is available as fixed glazing, sliders or bi-folding configurations ideal for patio and loggias. When the brief requires unobstructed views, think of US.

SHUTTERS R US

Distinctive

Western Red Cedar Plantation Shutters are a timeless enhancement to any interior. Our exclusive range features... The Louver Mover™ patented operating system. Note the absence of any tilt rod or intrusive stick required by other shutter providers, ours is completely hidden and backed by a lifetime warranty.

We hand pick the Cedar for colour and grain and do not stain or lacquer this beautiful wood. Our design requires no mid rail and we offer variable layout or banks of blades to suit privacy and ventilation settings.

Tranquil

Our Plantation Shutters close tight and provide superb light control for bedrooms. Ventilation and privacy settings provide flexibility and practical solutions and can be used as room dividers, patio screening or simply adding an elegant look to a project.

Our Cedar Shutters offer many décor options in varying blade contours and custom colours. The classical designs suit heritage homes and contemporary spaces equally well.

Chosen with confidence for their practicality. Our Aluminium Plantation Shutters exactly match our Cedar Shutters profile. Great where more robust usage, high traffic, security or outdoor situations apply.

Elegant

Profiles range from 45mm to 150mm to suit any application or design. We offer extended warranties on material and powder coated or anodized finishes. The shutters can be automated to the "smart house" system and incorporated with our Millennium Balustrades system.
